

Exhaust Systems.

1. All vehicles must be fitted with an efficient exhaust system.
2. A decibel reading of 98 decibels measured on the track under racing conditions will be enforced.
3. The exhaust system must be isolated from the driver. Either beneath the floor or if run inside the car, the exhaust must be covered in casings of sound material.
4. Inadequate or faulty exhaust systems due to losing part of the exhaust while competing may result in disqualification.
